

EL PASO HERALD

Shipments of Cattle to Market Are Many From That Part of State.

There was some local rainfall in different parts of the country around El Paso, Tex., last week, said Inspector J. M. Howell of El Paso, in his last report to the Panhandle and Southwestern Stockmen's association office here. In northeastern New Mexico and around Clayton, there has been lots of rain. The range is good and the cattle are getting fat, and many are being moved to market, he said.

Joseph Smith sold two carloads of cows and calves to Liggett Commission company and shipped them from El Paso to Kansas City.

Samuel L. Howell shipped two carloads of steers from El Paso to Kansas City.

L. E. Brown shipped four carloads of fat cows to the Kansas City market from El Paso.

J. E. Brown sold two carloads of calves to Burlington Commission company, and shipped them from El Paso to Kansas City.

Rube Johnson shipped one carload of mixed cows and calves to Williams, Lang and Perry, shipped from El Paso.

Other Market Shippers.

Other shipments to the Kansas City market were: A. J. Sullivan and son, two carloads of dry fat cows to Williams, Lang and Perry, shipped from El Paso.

W. E. Brown shipped one carload of fat cows to the Kansas City market from El Paso.

W. E. Brown shipped one carload of fat cows to the Kansas City market from El Paso.

W. E. Brown shipped one carload of fat cows to the Kansas City market from El Paso.

Marr's Long Staple Cotton Coming Fine

Local Realtor, Experimenting, Hopes to Get More Than Half Bale.

Long staple cotton on an experimental farm, planted and cultivated under orders of James L. Marr, of El Paso, near Clint, in the El Paso valley, will yield from a half to three-quarters of a bale to the acre, from the present outlook, Mr. Marr said Tuesday morning. There is only an acre or so of the cotton, but it was planted in plots 20 by 20 feet and an accurate history kept of each plot. Cotton bales weigh about 500 pounds and long staple is worth from 65 to 70 cents a pound, Mr. Marr said.

The plants, which are about three feet in height, are blooming now and the bolls are beginning to form. He expects the cotton to be ready for picking in about 30 days. He hopes to get more than half a bale to the acre, but he is not sure. He is experimenting with the cotton, and he is not sure of the results. He is not sure of the results. He is not sure of the results.

ADAMS LEAVES RAY-HERCULES

General Manager Resigns to Take Up Work on Defence Council.

Ray, Ariz., July 21.—C. H. Adams has resigned from the position of general manager of the Ray-Hercules mines at this point, effective July 21. He will make his headquarters in the future at Phoenix, having accepted appointment as vice chairman and actual director of the Arizona council of defense, a work that is expected to keep him very busy for the next year at least.

He will retain interests in Ray, however, having a bond and lease on the Ray Silver Lead property, from which he is shipping a carload of lead carbonate a day, while he has leaseholds on several other local properties.

Mr. Adams has had broad experience in mining. When 20 years of age, he left the United States for South Africa, to be chief mining engineer for the DeBeers company. He became active manager for the Kimberley & DeBeers mines at Kimberley and was general manager for the Voorspoed diamond mine at Kromstad, Orange River colony, in each case making a notable success.

Mr. Adams is now in Ray, where he is taking charge of the Hercules operations in August, 1918. Drilling operations were prosecuted all March 12, 1918, when he started the main shaft. The mine has reached the producing stage and is now producing a few ounces of gold a day. The mine is expected to be producing a few ounces of gold a day.

United Verde Blast Furnace In Operation

Twenty-five Tons Of Copper Are Turned Out In First Day's Run.

Jerome, Ariz., July 21.—After several attempts and a couple of "freezes," the United Verde Extension's blast furnace is in operation, with 25 tons of copper as the result of the first day's run. The first product of the new works. The reverberatory furnaces will not be completed for a couple of months. In the meantime, shipments of rich sulphides will continue to be made to Douglas and Humboldt, President J. S. Douglas of the company is on the ground for the first time in a year, having been absent on Red Cross work in Paris. He will stay only a few days and then will return to El Paso, after a short vacation in the northwest.

Green Monster Leaves Tunnel.

The Green Monster has abandoned work in its George tunnel, after depositing 100 tons of copper. It is expected there will be lateral development. The shaft this far is dry. It is reported the company has more than \$1,000,000 in copper reserves.

Jerome-Verde Crosscutting.

Jerome-Verde is crosscutting from the northeast drift of the Columbia across the state line to reach a body of iron found by the Verde company. It is being done on the Mainstay claim, connected with the Columbia by tunnel.

Calumet & Jerome is to transfer all its development work to drilling from across the state line to reach a body of iron found by the Verde company. It is being done on the Mainstay claim, connected with the Columbia by tunnel.

BISSON'S LEASE EXPIRES

Lease Expires in February, But Holders Expect to Make \$700,000.

Bisbee, Ariz., July 21.—The lease on the Higgins mine is running around 25 percent copper, a record not equaled in this camp for many years past. It is said that about 20 feet of ore thus far cut will average better than 25 percent, that much of it is half copper, and that 20,000 tons is a moderate estimate of the quantity of such ore in sight. The leaseholders are shipping over a carload a day of ore that returns 700 pounds of copper to the ton.

Another Rich Strike.

Just west of the Higgins, about 400 feet distant from the latter's rich strike, the Marks-Meyer Mining and Leasing company, at the depth of only 40 feet in an incline shaft, cut a four foot vein of copper glance and carbonate. The sample from three to 25 percent copper and runs very high in silver. Later, 200 feet to the westward and 25 feet lower on the incline, a 20 foot shaft was sunk, and a drift was run to get under the ore of the incline. At 40 feet from the shaft, the ore was found to be a drift, probably the same as known above.

To Make Fortune By February.

The Higgins lease expires next February. In the meantime, the fortunate holders figure they will make about \$700,000. They mainly are practical miners, farmers, in the Southwest mine of the Copper Queen company, men who had figured out that the Higgins mine was a good one to continue over into Higgins ground.

Changes Opinion About Ground.

The discoveries have served to overturn a deep impression in this camp that there was no ore of importance in the western end. Now it is expected that there will be a renewal of prospecting in this section, where it is believed silver values will prove even greater than those of copper.

The Higgins lease will be in being given a test run after investment of \$150,000 in the plant. It is expected to produce 200 tons daily, with 1,000,000 tons to draw upon. The Copper Queen was about \$200,000 a year ago, and it is expected to be handled in connection with its new copper concentrator.

At The WHITE HOUSE Before The War Values

Fall Dresses On The Second Floor

\$15

THE NEW FALL DRESSES portray "before the war" values. The materials are wonderful and include SATINS, CREPE DE CHINES, TAFFETAS AND OTHER SILKS

125 MINERS AT SWANSEA LEAVE FOR OTHER PLACES

Phoenix, Ariz., July 21.—From Swansea has come news that the miners employed by the Swansea lease, 125 men in all, have quit work and have left the camp for other points. At the same time, it is said, there was no strike, the miners being due to dissatisfaction over an alleged raise in the price of board, lodgings, lights and doctor's fee.

It is said also that the 50 cent raise in wages that was made effective July 1, 1918, was not enough to attract miners to Swansea on July 1. It is said to have been an indirect order of Swansea boss, W. E. Brown, who is at the head of the leasing corporation.

Too Old For Fighting, Utah Man Sells Garden Produce For Red Cross

Salt Lake City, Utah, July 21.—Sumner Oldham of this city, 61 years old, grieving because he could not aid the American troops in France by being with them, has shown his patriotism in the following manner.

Mr. Oldham has a thriving war garden, when he learned of the thrilling American victories over in France, he decided he would sell the vegetables produced in his war garden and turn over the money to the Red Cross.

Mr. Oldham is further credited with offering to give \$10 to any person in Salt Lake City who will give him a quart of his garden produce.

Wet Goods Are Found Beneath Load Of Hay

Hammonton, Ind., July 21.—Even hay that is hauled within these precincts must be distinctly dry.

The other day it was commented on that constantly down the road, from across the state line, a load of hay, came a slow, deliberate horse, driven by a sleepy-eyed, patient looking woman, who was hauling a load of hay.

Police became suspicious and, upon investigation, found under the hay sufficient liquor to make the trip worth while.

The daily load of hay has ceased, and they're thinking up a new one over here.

Wife Feigns Insanity To Stop Hubby's Drunken Raffles By Her Perfume

Berkley, Calif., July 21.—Berkley police are literally on the scent of a female raffles who is believed to have robbed several homes lately. The female thief smokes cigarettes while she works and leaves the stubs scattered about. On each occasion a strong odor of perfume is noticed. The police are sniffing all suspicious looking females in an effort to detect a similar aroma.

Girl, 22, Is Appointed Federal District Attorney

Seattle, Wash., July 21.—Although only 22 years old, Miss Charlotte Kolmitz of this city, is the second woman in the country to be named assistant federal district attorney. Miss Kolmitz occupies this position for the western Washington district.

Miss Kolmitz was born in Omaha. Her father is a Russian who arrived in America when 19 years old.

Indian Saw Visions Of "Streaks" Years Ago

Seward, Alaska, July 21.—The building of the government's Alaska railroad has not only fulfilled a prophecy of an old Indian chief, but the natives in this part of the territory are now seeing a vision of the old chief's prophecy.

Two brown streaks running through the country and ending at the ocean shore. The natives believe these streaks indicated the steel rails of the road now under construction.

Divorce Applicant Says Women "Most Peculiar"

Los Angeles, Calif., July 21.—Shirley E. Chapman says women are "most peculiar."

On a certain Monday not long ago, Chapman says, his wife was, apparently, in a bad mood. She was "mad" and "made a big fuss over him."

The next day she disappeared, he claims, leaving the following message: "I'm going to the one I love best, so don't expect me back."

"Can you beat it?" asked Chapman, in applying for a divorce.
